THE PARTICULARS:

CardBoard is a fun little pocket-sized game we play a lot around here. Whatever surface you can find becomes the playing field, and the cards make up the board - which is different every time. Strive for points, follow the safe routes, build traps for your opponents and try to stay out of the traps yourself!

Equipment & Features:

CardBoard includes a deck of 86 special cards upon which are marked moves, points scoring information, and special bonuses as might be found on a "roll-and-move" game board. The box includes a die and two pawns - for more players, you can borrow some from another game - or improvise!

Promo Video on YouTube:

We've uploaded a video introduction to the game where you can see it played and hear about some of the main features of the game.
