

Tesla Master of Lightning

For 2 to 6 players
ages 12 and older
20 to 30 minutes.

The Particulars:

Inspired by the great engineering genius, Nikola Tesla, the 144 cards in this deck reflect moments of triumph and disaster in his fascinating life. From his friends and his enemies, to his revolutionary inventions and eccentric scientific claims.

As the game unfolds, players will use what cards they are dealt to bid on “prize cards” as they are revealed. Some are positive and some negative; some have immediate value and others only for the final score.

Each round includes three bidding opportunities, and the cards won during these turns will become part of the player’s own deck as the game goes on. As your deck grows, so grows your power! Collect millions of volts and avoid the negative effects, and in the end the highest total wins!

Promo Video on YouTube:

We've uploaded a video introduction to the game where you can see it played and hear about some of its main features. There is also a detailed “how to play” video. Visit our website for the links!
